## SUPPLEMENTARY PRODUCT INFORMATION

### Acid-based foaming cleaner for condensers

#### PROPERTIES AND APPLICATION

AIR AC PLUS is an acid-based degreasing cleaner with high foaming power, a concentrated product, formulated for cleaning and maintaining condenser coils (outdoor units).

The foam, by expanding and growing clean, degreases and expels dirt, leaving the condenser coil clean and shiny. It will help us to maintain the equipment with the maximum efficiency to heat exchange and increase air circulation.

It does not attack metals such as copper and aluminum.

It is used for cleaning and maintenance of condensing batteries (outdoor unit).

#### INSTRUCTIONS FOR USE

Apply the appropriate dilution to the state of dirt of the equipment, spray with our IK sprayer, let the AIR AC PLUS act for 10/15 minutes. We will observe that it produces foam, which will act well to expel all the dirt deposited in the condenser coil. Next, apply water, without requiring any pressure, due to the great pulling power of the product.

The product must be diluted in a proportion between 1:1 and 1:10 in water, depending on the state of the equipment that we are going to clean.
